Problem Statement-
Design and build next-generation GenAI solutions that address real-world challenges across digital media, fintech, education, healthcare, sustainability, smart cities, and open novel innovation.

Idea Submission Format -

Problem Statement: Clearly define the real-world problem your GenAI solution aims to solve and who it impacts.

Motivation: Explain why this problem matters and what gap or opportunity motivated your idea.

Application: Describe the real-world use case, target users, and where your solution will be applied.

Proposed Method: Outline the GenAI approach, models, or techniques you plan to use to solve the problem.

Datasets / Data Source: Specify the datasets or data sources required, including their availability and type.

Experiments: Explain how you will validate or test your solution using experiments or evaluation metrics.

Novelty and Scope to Scale: Highlight what makes your idea unique and its potential to scale or expand impact.
